The International Institute for Primary Health Care in Ethiopia (IIIfPHC-E) was established in February, 2016 to become a global center of excellence for training and implementation research in Primary Health Care (PHC). IIIfPHC-E aims to strengthen the internal processes and management of PHC systems.

**Mission**
To provide training on Primary Health care and to conduct PHC research

**Vision**
To contribute to the revitalization of the global movement of Health for All through PHC

**Objectives**
- Capacity building on PHC systems and community health workers program
- Building the evidence base for PHC, addressing gaps and challenges and identifying strengths for timely implementation by policy makers
- Being a resource for PHC by facilitating sharing and networking among PHC implementers and researchers

**Activities**
IIIfPHC-E works toward achieving its vision in three ways: training, research and resource center

**Plan**
Implement the strategic plan (2018-2022)

**Key partners**

---

The National Public Health Training Center where IIIfPHC is located and training takes place.
